PERSONAL PROJECTS

ONLINE WORK MANAGEMENT-Java, SpringBoot

- **Tech Stack:** ReactJS, Bootstrap, Spring Boot, MySQL, Hibernate
- **Project Objective:** Developed the Online Work Management software project to offer a comprehensive platform for monitoring and tracking work progress across multiple projects.
- **User Roles and Responsibilities: Admin Role:** Enabled Admins to manage Managers and Employees within the system. Admins can add, modify, and remove users, maintaining an organized and up-to-date user database.
- **Manager Role:** Central to the project workflow, Managers possess the ability to add Employees, assign them to projects, and allocate tasks. Empowered Managers to track task progress, provide feedback, and evaluate employee submissions, with options to either approve the work or request revisions.
